His 4815, Spring 2012, Newton Key, Mapping Ireland, 26 Jan., 2 Feb.

"I got my atlas out of my bag. We hadn't used it much, only for learning the counties of Ireland so far. Offaly was the easiest one to remember because it was the hardest. Dublin was okay just as long as you didn't mix it up with Louth. With Fermanagh and Tyrone it was hard to remember which was which. I stared at the map of Ireland from the top to the bottom. There was nowhere I wanted to run away to, except maybe some of the islands. I was still going to do it though. You couldn't run away to an island; you had to sail or swim part of the way. It wasn't like a game though; there were no rules that you had to stick to. An uncle of mine had run away to Australia." Roddy Doyle, *Paddy Clarke Ha Ha Ha* (1993)

In preparation for a future map component of exams, prepare a group report on the geography and history of one province between 1650 and 1800: Connacht (Anderson, Bostrom, Collins, Corrigan); Ulster (Ethridge?, Grissom, Kramer, Milojevic, Neely); Leinster (Nelson, Noffke, Owens, Racine); Munster (Rodgers, Watkins, Wilburn, Wilkans, Zarate).

For each province, provide us with: (a) 1-2 events (that you can locate in time and space) for each half century (1650-1700, 1701-1750, 1751-1800), (b) three counties (describing where and their significance before 1800), two rivers or mountains (or mountain ranges, including where they are and significance), and (c) one city (again locate and tell significance). On both days I need the group to fill in a sheet with this information; by the 2nd half of 2 Feb., you will present a group Powerpoint (6-10 slides, no more than 20 seconds/slide) illustrating (a–c), with the last slide being your sources for the Powerpoint.

Province:

Names: _____

_____

_____

_____

_____

Sources (rough citation is fine):

1. 1650-1700
    a. Event
    b. Event
2. 1701-1750
    a. Event
    b. Event
3. 1751-1800
    a. Event
    b. Event
4. county:
    a. Where
    b. Significance
5. county:
    a. Where
    b. Significance
6. Physical attribute
    a. Where
    b. Significance
7. Physical attribute
