Eastern Illinois University Fall Semester 1999

Geology/Geography Department 1300C Syllabus

COURSE NUMBER: GEL/ESC 1300C INSTRUCTOR: John Stimac

CLASS HOURS: MW 4 - 4:50 PM OFFICE LOCATION: Science 139

LAB HOURS: Sec. 8: Tuesday 1600 - 1740;

Sec. 9: Thursday 1400-1540; Sec. 10: Thursday 1600 - 1740

OFFICE HOURS: MW 5 - 6 PM, R 8 - 10 AM; often after class, and by appt.

(581-7016)

TEXT: Physical Geology, 3rd ed., Monroe and Wicander

OBJECTIVES:

During this course, I hope that you'll gain an appreciation of science and the world around us - specifically how geology can, and does, relate to your life and the community. Everyone should be able to discuss, and give examples of, geology's significance to our everyday life and why it's important. There are a number of geologically important issues that will affect the way you live the rest of your life, such as natural hazards, global warming, and life on other planets: I want you to be able to critically assess those issues, so you don't have to depend on Rush Limbaugh and Al Gore to do your thinking for you. You will also be able to identify the common rock-forming minerals and be able to identify rocks that are found locally and discuss their significance. Concepts covered will include geologic time, the Earth's structure and origin, common rocks and minerals, and plate tectonics. Finally, a number of you will use geology in your careers, and I want you to be prepared for that.

GRADING:

Grading will be based on merit; that is, you will be graded primarily against your fellow students. A <u>tentative</u> breakdown is as follows:

Questions of the Day	3 pts. each	66 pts.
Labs	10 pts. each	100 pts.
Quizzes	50 pts. each	200 pts.
Mid-term Examination	150 pts.	150 pts.
Report	50 pts.	50 pts.
Lab Final	100 pts.	100 pts.
Final Examination	200 pts.	200 pts.
Total points available:		866 pts.

<u>Questions of the Day:</u> **3 pts. each.** The Questions of the Day will be handed out at the beginning of each class and are due at the end of class. The question will concern some aspect of that day's lecture. Total value: 66 pts.

Quizzes: 50 pts. each. Quizzes will primarily cover material taught since the previous quiz or examination, but may also include earlier material. Format will be short answer, label the diagram, and completion. Quizzes will last 30 minutes. Total value: 200 pts.

<u>Labs</u>: **10 pts. each.** Labs will cover the rock-forming minerals, the three major rock types, structural geology and physics of the earth's interior. Labs will be approached in a hands-on type of atmosphere -- the same manner in which the Lab Final will be given. There will be ten (10) labs.

<u>Mid-term Examination</u>: **150 pts.** The mid-term examination will have the same format as the quizzes and will cover everything up to, and including, metamorphic rocks and processes. The mid-term examination will last one hour. Total value: 150 pts.

<u>Students with Disabilities</u> (Whether learning, physical, hard of hearing, psychiatric, or sensory)
Eastern Illinois University promotes equal educational opportunities for students with disabilities. If you have a disability and may need any assistance, please notify your instructor and make an appointment immediately with the Office of Disability Services (Buzzard House, or call 581-6583)

Stimac; Fall term, 1999; Geology/Earth Science 1300C; syllabus

Report: 50 pts. There will be one report due from each student. Topics can be anything covered in class or agreed upon with the instructor. Topics must be approved no later than October 13. Total value: 50 pts.

Grading of the reports, from the field trip or otherwise.

Content:

grade	criteria	approximate grade
5	outstanding explanation with superior supporting	98
	information; unusual insights and flashes of	
	brilliance; creative and original analyses and	
	thoughts; goes well beyond minimum required	
4	for assignment.	00
4	good solid job on explanation with excellent support	88
	from examples, data figures, etc., excellent reasoning, or excellent explanations; goes beyond	
	minimum required for assignment.	
3	good solid job; does what the assignment asks; decent	78
	reasoning or explanations; decent support by data,	-
	examples, figures, etc.	
2	decent explanation but too general or some	68
	inaccuracies or flaws in reasoning or coverage is	
	accurate but cursory and does not meet the minimum	
1	required for a complete answer. doesn't effectively address assignment; fails to	58
1	support assertions with data or examples; unclear	30
	explanations; inadequate understanding; majors flaws	
	in reasoning or explanations.	
0	answer missing or does not answer the question	0
Writing:		
grade	criteria	approximate grade
5	meets criteria for 4, but also has a sense of style,	100
	going beyond grammatical correctness to real readability.	
4	excellent paper/paragraph organization, interesting	90
	sentences, good grammar, very few spelling errors, does	
3	not read like a first draft. decent organization; serviceable prose; reads like a	80
3	first draft; a paper with excellent writing will still	00
	earn a 3 if it contain many spelling errors and is	
	clearly not proofread.	
2	disorganized; awkward sentence structure; poor	70
	grammar; poor spelling.	
1	similar problems to 2, but worse.	60

<u>Lab Final:</u> 100 pts. There will be a practical lab final. The final will test the student's ability to correctly identify hand specimens and solve basic geologic exercises using topographic and geologic maps. The lab final will last one hour. Total value: 100 pts.

Final Examination 200 pts. The final examination will have the same format as the mid-term examination and will cover the entire course. This may include ideas presented in lab. The final exam will last two hours. Total value: 200 pts.

MAKEUPS or LATE ASSIGNMENTS:

No makeups will be allowed for missed questions of the day or quizzes or labs; examination makeups will only be allowed for unusual circumstances that are discussed with the instructor, preferably ahead of time.

ATTENDANCE:

Attendance is up to the student; however, roll will be taken during the first two weeks of class. **CAUTION**: It is unlikely that you will be successful in this class unless you attend regularly.

CLASS SCHEDULE

1 August 23, 25 Introduction, Major features of the Earth; Earth's origin and structure Chapt. 12 2 August 30, September 1 Minerals (continued) Lab: Introduction to the rock-forming minerals Lab 1 3 September 8 Quiz #1 (formation and minerals) Lab: Introduction to igneous rocks 4 September 13, 15 Igneous rocks, volcanism Chapt. 4 Lab: geneous rocks 5 September 20, 22 Sedimentary Rocks and Processes Lab: Sedimentary rocks 6 September 27, 29 Geologic Time Scale Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time 7 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks and Processes Lab: Metamorphic Rocks 8 October 11 Review and catch-up; Introduction to weathering October 13 Mid-term Examination (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) 9 October 18, 21 Earthquakes and the interior of the Earth Chapt. 5 10 October 25, 27 Topographic maps and cross-sections Lab: Topographic maps and cross-sections Lab: Structural geology 11 November 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology 12 November 8, 10 Mass Wasting Lab: mass wasting November 17 Running water, groundwater Quiz #4 (mass wasting and running water)	
September 1 Minerals (continued) Lab: Introduction to the rock-forming minerals Lab 1 3 September 8 Quiz #1 (formation and minerals) Lab: Introduction to igneous rocks 4 September 13, 15 Igneous rocks, volcanism Lab: igneous rocks Lab: Geologic Time Scale September 20, 22 Sedimentary Rocks and Processes Lab: Sedimentary rocks 6 September 27, 29 Geologic Time Scale Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time 7 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks 8 October 11 Review and catch-up; Introduction to weathering October 13 Mid-term Examination (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) 9 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: Structural geology 11 November 3 Quiz #3 (earthquakes and topographic maps) Lab: Structural geology 12 November 8, 10 Mass Wasting Lab: mass wasting 13 November 15, 17 Running water, groundwater Chapt. 15, 1	. 1
3 September 8 Quiz #1 (formation and minerals) Lab: Introduction to igneous rocks 4 September 13, 15 Igneous rocks, volcanism Lab: igneous rocks, volcanism Lab: gineous rocks 5 September 20, 22 Sedimentary Rocks and Processes Lab: Sedimentary rocks 6 September 29 Geologic Time Scale Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time Chapt. 8 Lab 13 7 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks Chapt. 7 Lab 4 8 October 11 Review and catch-up; Introduction to weathering October 13 Mid-term Examination (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) 9 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: Structural geology 11 November 1, 3 November 3 Quiz #3 (earthquakes and topographic maps) Lab: Structural geology 12 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 15, 17 Running water, groundwater Chapt. 15, 15	
Lab: Introduction to igneous rocks 4 September 13, 15 Igneous rocks, volcanism Lab: igneous rocks 5 September 20, 22 Sedimentary Rocks and Processes Lab: Sedimentary rocks 6 September 27, 29 Geologic Time Scale Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time 7 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks 8 October 11 Review and catch-up; Introduction to weathering October 13 October 13 Chapt. 5 9 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: Structural geology 10 November 3 Review and topographic maps Lab: Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology Chapt. 13 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 November 15, 17 Running water, groundwater Chapt. 15, 16	
Lab: igneous rocks Lab 2 September 20, 22 Sedimentary Rocks and Processes Lab: Sedimentary rocks Chapt. 6 Lab 3 September 27, 29 September 29 Chapt. 8 Geologic Time Scale Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time Lab 13 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks Review and catch-up; Introduction to weathering October 13 October 13 October 13 Lab day to approve report topics Lab: Introduction to weathering (lecture) Chapt. 5 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: Structural geology November 3 November 3 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 November 15, 17 Running water, groundwater Chapt. 15, 16	
Lab: Sedimentary rocks Lab 3 6 September 27, 29 Geologic Time Scale Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time Scale Lab 13 7 October 4, 6 Metamorphic Rocks and Processes Chapt. 7 Lab 4 8 October 11 Review and catch-up; Introduction to weathering Mid-term Examination (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) 9 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: Structural geology 11 November 1, 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology 12 November 8, 10 Mass Wasting Lab: mass wasting 13 November 15, 17 Running water, groundwater Chapt. 15, 1	
September 29 Quiz #2 (igneous rocks and volcanoes) Lab: Geologic Time Lab 13 7 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks Review and catch-up; Introduction to weathering October 13 October 13 October 13 October 13 October 14 Preview and catch-up; Introduction to weathering Mid-term Examination (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) Chapt. 5 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes Lab 5 October 25, 27 Topographic maps and cross-sections Lab 6 November 1, 3 November 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology Lab 7 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 November 15, 17 Running water, groundwater Chapt. 15, 1	
Lab: Geologic Time Lab 13 7 October 4, 6 Metamorphic Rocks and Processes Lab: Metamorphic Rocks Review and catch-up; Introduction to weathering October 13 October 13 October 13 October 13 October 14 Barthquakes and the interior of the Earth Lab: Earthquakes Lab: topographic maps and cross-sections Lab: topographic maps and topographic maps) Lab: Structural geology Lab 7 November 8, 10 Metamorphic Rocks and Processes Chapt. 7 Lab 4 Review and catch-up; Introduction to weathering Mid-term Examination (comprehensive) Lab 4 Review and catch-up; Introduction to weathering Mid-term Examination (comprehensive) Lab: Introduction to weathering (lecture) Chapt. 5 Chapt. 9 October 18, 21 Earthquakes and the interior of the Earth Lab 5 Topographic maps and cross-sections Lab 6 Thapt. 13 November 1, 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology Lab 7 November 3 November 3, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 November 15, 17 Running water, groundwater Chapt. 15, 1	
Lab: Metamorphic Rocks Lab 4 8 October 11 October 13 October 13 October 13 October 13 October 13 October 14 Particle Provided Review and catch-up; Introduction to weathering (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) Chapt. 5 9 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes Chapt. 9, 10 Lab 5 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab: topographic maps and cross-sections Lab 6 11 November 1, 3 November 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology Lab 7 12 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 13 November 15, 17 Running water, groundwater Chapt. 15, 1	
October 13 October 13 October 13 October 13 October 13 Mid-term Examination (comprehensive) Last day to approve report topics Lab: Introduction to weathering (lecture) Chapt. 5 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes Chapt. 9, 10 Lab 5 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab 6 November 1, 3 November 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology Lab 7 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 November 15, 17 Running water, groundwater Chapt. 15, 1	
9 October 18, 21 Earthquakes and the interior of the Earth Lab: Earthquakes 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections 11 November 1, 3 November 3 Rock Deformation Quiz #3 (earthquakes and topographic maps) Lab: Structural geology 12 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 13 November 15, 17 Running water, groundwater Chapt. 15, 1	
Lab: Earthquakes Lab 5 10 October 25, 27 Topographic maps and cross-sections Lab: topographic maps and cross-sections Lab 6 11 November 1, 3	
Lab: topographic maps and cross-sections Lab 6 11 November 1, 3	
November 3 Quiz #3 (earthquakes and topographic maps) Lab: Structural geology Lab 7 12 November 8, 10 Mass Wasting Lab: mass wasting Chapt. 14 Lab 8 13 November 15, 17 Running water, groundwater Chapt. 15, 1	
Lab: mass wasting Lab 8 13 November 15, 17 Running water, groundwater Chapt. 15, 1	
Navambar 17 Ouis #1 (mass wasting and running water)	6
November 17 Quiz #4 (mass wasting and running water) Lab: aquifers, lakes and streams Lab 9	
November 23, 25 No classes - Thanksgiving recess	
14 November 29 Desert processes Chapt. 18 November 29 All reports are due (NO EXCEPTIONS) December 1 Deserts (continued), catch-up Lab: Deserts Lab 10	
December 6 REVIEW FOR LAB FINAL December 8 REVIEW FOR FINAL EXAM LAB FINALS TO BE HELD IN LAB THIS WEEK	
December 13 FINAL EXAM (5:15 - 7:15 PM)
